

Google Project Management Certificate Completer: Personal Closing Report

Executive Summary:

This experience from learning project management from Google was such a great experience. Starting from understanding project management deeper and watching Google Project Managers handle projects and share their knowledge, we were able to know how they successfully manage projects and implement their knowledge. The capstone project from the last material was also helpful for project management's portfolio.

Key Accomplishments:

- Finishing Foundation of Project Management
- Finishing Project Initiation: Starting Successful Project
- Finishing Project Planning: Putting It All Together
- Finishing Project Execution: Running the Project
- Finishing Agile Project Management
- Finishing Capstone Project: Applying Project Management to Real-World
- Complete all materials with various obstacles and other tasks

Lessons Learned:

- Know a lot of project management terms and techniques for managing a project
- Learn 5 phases of project management (initiation, planning, execution, monitoring, and closing)
- Learn the quality management phase to ensure the project meets the quality standards
- Learn how to use Agile Methodologies using Asana
- Learn common project management methodologies, waterfall and agile
- Learn how to negotiate and evaluate project progress through beta testing, internal checklist, and feedback surveys
- Learn how to create a project plan and use some of the tools that can help to create it
- Learn how to determine an accurate project plan by consulting with task experts and analyzing previous project report

Next Steps:

- Always eager to learn more about project management approaches and apply this knowledge to the real world
